DA PAM 25-30 Installation Instructions

Instructions for Installing The DOS application DA PAM 25-30

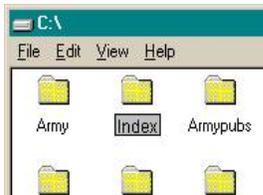

(These procedures assume a previous installation on your PC.)

The following instructions are for the users who download the self-extracting version of the DA PAM 25-30

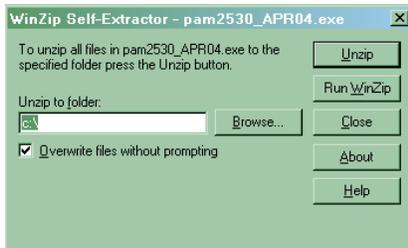

Step 1. Download this self-extracting file (PAM2530.exe) to your desktop (see options above).

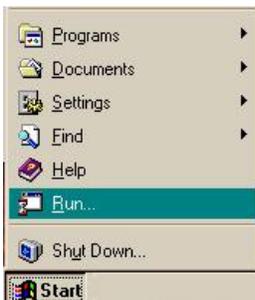

Step 2. Click on the My Computer ICON on your Desktop

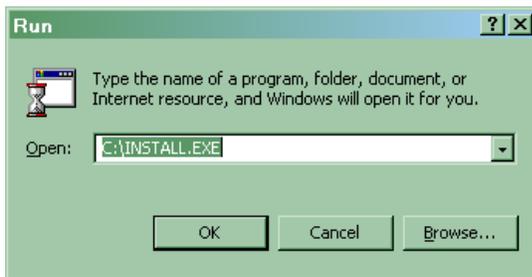

Step 3. Locate your primary directory. Most often, this will be your C: drive (though your PC may have other drives/directories). Within the C: directory there should be a folder named INDEX. The PAM 25-30 INDEX folder should contain files named Armyhelp.txt, Da_poste.txt, pam.bat, etc. Once you **confirm** that the INDEX folder has these files, you know you have identified the correct PAM 25-30 INDEX folder. DELETE this INDEX folder. After you have completed this, close your open windows and any running applications. Return to the desktop level.

Step 4. Locate the PAM2530.exe self-extracting file on your desktop, and double click it. Select the Unzip Button, unzipping to your C:\ drive. After you have unzipped, you may select close. After completing the steps below this file (PAM2530.exe) may be removed from your desktop and archived to another folder or deleted.

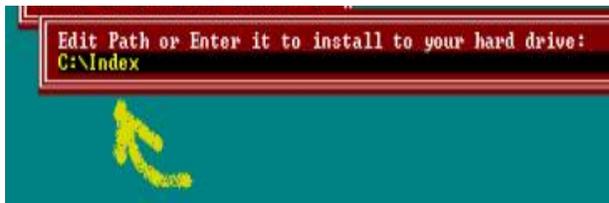

Step 5. Click on **Start** then; Select **RUN**

Step 6. Type: C:\INSTALL.EXE in the 'Run Command Line'. Then Click OK.

Step 7. Once the installation starts, you will be prompted for setup information. The first prompt asks for the location of your CD-ROM drive. Since this version of the DA PAM 25-30 runs from your hard drive instead of the CD, please disregard this prompt and enter the letter **C** then press your Enter key.

Step 8. Change the Edit path to C:\Index and press Enter. The following screens will require your pubs account number followed by a screen requesting a ZIP code. If you know your pubs account number and ZIP Code, enter them when prompted. If you do not know your account number, or ZIP, use the example values provided (A9999, 22331).

*Note: If there are access restrictions installing applications to your C: drive (such as in some NT environments), you may want to install the PAM 25-30 to your D: directory on your hard drive and change this path from "C: to D:" You will be prompted whether to create a new directory. Answer Y.

TO CREATE a DeskTop Icon for the DA PAM 25-30 -You go back to the "DeskTop" level. Right click your mouse,

1. Select 'New'
2. Select 'Shortcut'
3. Browse
4. Locate the 'Index' Folder on the drive where you installed the PAM 25-30 Index folder.
5. Open the INDEX folder and double click the "pam" or "pam.bat" FILE.
6. Click Next, then Finish
7. You now should have a DeskTop Icon for the PAM 25-30.
