Figure List

Figure A2.1: Organizational Chart for Joint Technical Coordinating Group for Munitions Effectiveness, page 2

1. Developing JTCG/ME Publications.

Department of the Defense (DoD) Components (Army, Navy, Air Force, Marine Corps, and DIA) collaborate to develop and publish JTCG/ME documents. The Joint Chiefs of Staff (JCS) and DoD Components use these documents to plan and analyze attack missions, develop weapon requirements, and conduct wargaming exercises. The JTCG/ME operates according to the Joint Logistics Commanders (JLC) decisions and directions JTCG/ME publishes all material according to the JTCG/ME Publication Information Guide, 61JTCG/ME 1–3.

2. Responsibilities.

2.1. JTCG Steering Committee. The Army Materiel Command, Naval Ordnance Center, Air Force Materiel Command, Defense Intelligence Agency, and Marine Corps appoint staff–level representatives to the JTCG/ME Steering Committee as Principal Service Members. The Steering Committee:

(2.1.1) Directs Working Group studies, tests, meetings, other required activities, and funding.

(2.1.2) Establishes working groups to meet the needs of the tri–service operational commands and other users of nonnuclear munitions data.

(2.1.3) Coordinates technical data among Services, approves data for use in JTCG/ME publications and establishes priorities.

(2.1.4) Provides technical guidance to subgroups and approves submission of data generated by the subgroups.

(2.1.5) Prepares budgets and distributes funding for publishing all JTCG/ME publications.

(2.1.6) Develops, reviews, and coordinates the technical content of JTCG/ME publications, including changes and revisions.

(2.1.7) Establishes procedures for controlling the distribution of publications to agencies including non–DoD activities.

(2.1.8) Maintains security classification guidelines for publications.

2.2. Principal Services Members:

(2.2.1) Respond to requests for publication information.

(2.2.2) Coordinate JTCG/ME publications within their own Services and agencies to ensure they approve technical content and promptly authenticate JMEMs.

(2.2.3) Develop initial distribution lists for new JMEMs and an updated list for each JMEM change or revision.

2.3. Air Force:

(2.3.1) Provides the JTCG/ME Publications Management Office at Tinker AFB, OK. This office manages the publication, distribution, and sanitation of JTCG/ME documents.

(2.3.1.1) Sanitation is the process of removing data from the JTCG/ME documents and publications prior to release to customers or countries. The Publications Management Office will screen products and publications to blank out, remove, or omit all data not authorized or not needed by a particular customer.

(2.3.1.2) HQ AFMC/DRW controls distribution of JTCG/ME products and publications within DoD. Forward requests by DoD organizations or associated contractors for JTCG/ME publications to JTCG/ME PUBLICATIONS, OC–ALC/TILUB, 7851 2nd Street, Suite 206, Tinker AFB, OK 73145–9160.

(2.3.1.3) Since many JTCG/ME publications are classified or not releasable to specific agencies, DoD organizations or associated contractors must accompany their requests for these publications by verified security clearance and facility storage authorization. Contractors also must obtain approval from their contract monitor. For foreign government requests refer to paragraph 2.5.

(2.3.1.4) DoD program offices, laboratories, field activities, and associated contractors should submit requests for JTCG/ME publications in writing to the above address according to paragraph 2.3.1.3. Additional distribution instructions are in Part I of the Joint Service Index of Specialized Technical Handbooks, 61JTCG/ME 1–2.

(2.3.2) Manages JTCG/ME numbered documents program.

(2.3.3) Serves as the government contracting agency for the JTCG/ME General Support Contractor.
